Description

The OCXOs of MXODE series use the double-oven structure providing perfect temperature stabilization of the high precision crystal resonator and the oscillator circuitry. At only 15 cm³ volume and about 1.5 W power consumption the OCXOs provide up to 5×10^{-11} temperature stability in (-30 +70)°C, 1×10^{-12} /1s Allan variance and aging 1×10^{-10} /day aging rate. The MXODE series is excellent to use in Stratum II clock system, instrumentations, local reference as Rb-standard replacement and in other high-end applications. The oscillators are available in 8 - 100 MHz operational frequency range.
